

Dear Sam Davis,

It is always a great occasion to remember the beginning of a long friendship since the year 2010. You first came to us after the earthquake in Haïti. In 2012, the Burn Advocates network sponsored me as a senior general surgery resident to attend the American Burn Association Congress in Seattle. You continued to fight for Burn Advocates in Haïti at every occasion. This dedication is how the first burn foundation in Haïti, FONHAB came to be in 2018.

Next year Haïti's first pediatric burn camp, "Kan Wozo", will open with you as our partner.

Through the Burn Advocates Network and FONHAB, our successes will continue for years to come with you as our partner and sponsor.

Sam, I want to thank you for answering FONHAB's call to cover expenses for the care of our first severe burn patient's care after the oil tanker explosion in September 2024.

I also want to thank you for sponsoring and co-founding Kan Wozo.

We are so grateful for your generosity, and we hope that we continue our cooperation in 2025 through our 4 major upcoming projects:

-Haïti Grand Rounds 2025: happening in the first trimester of the year.

-Kan Wozo grand opening: July 2025.

-Severe burn care/laser treatments for children.

-Multimedia burn prevention campaign.

We are thankful for your continued support and shared success over the years. Here is to even more success in 2025. You and your team are a blessing to Haïti.

Dr. Rolph Richeme

Founder and CEO of FONHAB
